We use Shea butter, the fat extracted from the nut of the west African Karite tree, for this massage. The Shea butter, off-white in colour, is a semi-soft vegetable fat which moisturizes and nourishes the skin thanks to its essential fatty acid contents. Shea butter is naturally rich in Vitamin E and beta-carotene thanks to which it revitalises and softens the skin. This massage is especially recommended for those of you who want to get tanned since Shea butter offers UV protection of SPF 5/6 and its beta-carotene content promotes tanning.
